

W3 SERIES

General Description:

The WERECON W3 Series water treatment systems are specifically designed for smaller landscapes where irrigation water usually is supplied by city mains. This system features single or multi-pump fertilizer injection in a compact form factor. It incorporates the same great quality and innovation as our industrial grade golf course systems, but at a lower cost, and designed to treat smaller volumes of water. The system features flexible pump mounting options, including: Bulk Tank, Tote, or Drum based products. We can also provide a pre-plumbed manifold including ports for injection, bypass valves, and a flow sensor. Additionally, the W3 series makes use of our latest control system, the Green Scorpion 7, for unparalleled functionality and ease of use.

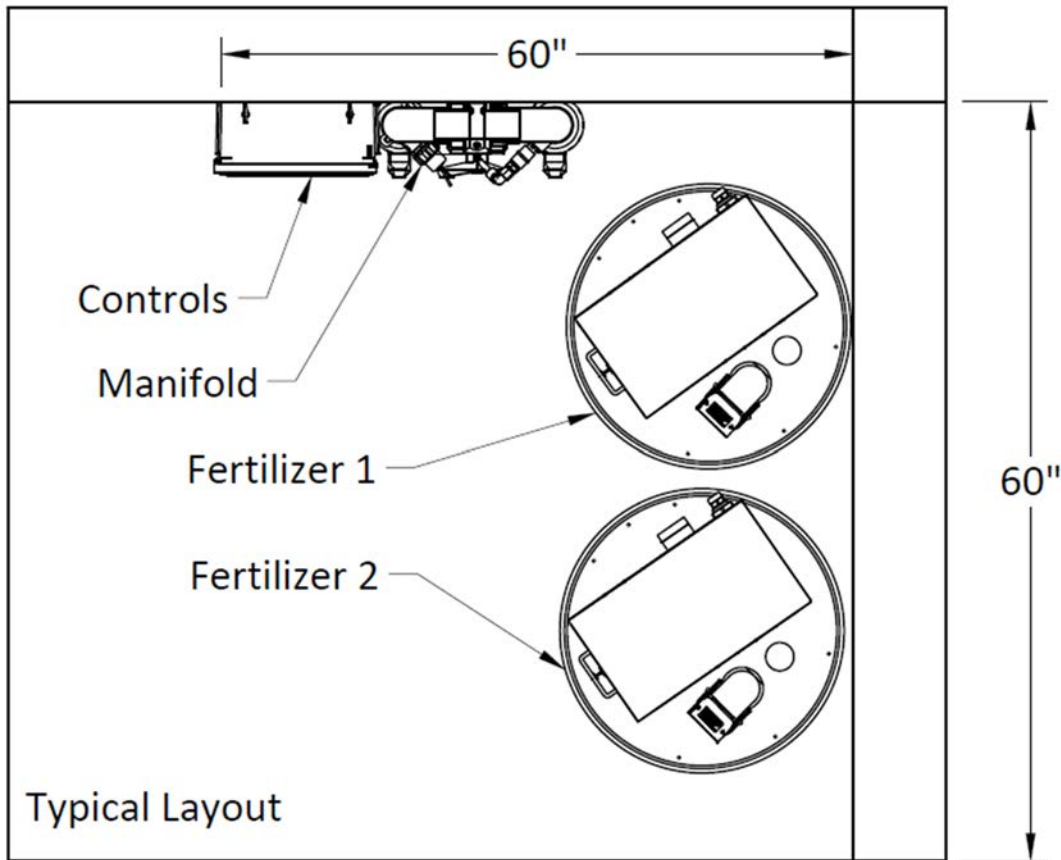

Features:

- Tamper proof, lockable outdoor rated pump enclosures.
- Pre wired and plumbed for easy installation.
- Records product and water usage over time.
- Simple to operate and maintain
- Capable of remote control and monitoring through cellular or wi-fi connection.
- Made in the USA.

W3 Series Technical Information

Specifications

Dimensions	Variable
Pump Diaphragm	PTFE
Pump Liquid end	Reinforced Polypro, or PVDF
Seals	Viton
Check valves	Ceramic
Input Power	110-120VAC Single Phase at 10 AMP
Pump capacity	1.3, 2.3, 5.5, or 8.5GPH
Pressure max.	150 PSI
Mounting	Mounting Suitable for Drum, Tote, or Bulk Tank (specify at ordering)

Pre wired power cordset for standard 120VAC Outlet.

Specifications Subject to Change at Manufacturers Discretion
